Hospital Southampton UK

This popular one day course focuses on ethical dilemmas in neonatal care.

Through a mixture of simulation, case based discussions, debate, facilitated role play and lectures; you will explore some of the challenging issues we face in practice.

Throughout the day, specialists in law and mediation will enhance these sessions with their domain-specific knowledge.

Places are strictly limited to 16-20, to ensure a low faculty to participant ratio, and to allow everyone to participate fully in the discussions.

Cost: Nurses 100 pounds Doctors 150 pounds

Previous courses have sold out quickly, and places are strictly on a first come basis.
